About our hardwired LED lighted shelves

All of hardwired LED lighted floating shelves are handcrafted in house and use UL and ETL Listed lighting components to make our shelving safely shine in your home.

All shelves are CNC milled, and hand finished using premium hardwoods available in a variety of finish colors and wood types to suite your space.

The LED light sits in an aluminum channel to help dissapate heat and features a no spot lens so you won't see any of the LEDs.

The lights are dimmable (with dimmable power supply/transformer).

50,000 Hour lifetime rating.

240 Lumens per foot.

24 volt DC input voltage required.

Wattage required is 3 watts per linear foot.

Power supply IS required but NOT provided. Lighting accessories required can be purchased on our site: www.jthomashome.com/collections/led-lit-floating-shelf-accessories

Precision CNC milled, hand-crafted, premium hardwood available in a variety of finish colors and wood types.

Light channel will arrive separately, allowing for channel to be installed with the wiring to exit the right or left side of the rear of the shelf.

Need custom, let us know!

WARNING: All brackets must be installed properly. Failure to do so may result in saggy shelves, falling objects, or even injury.

WARNING: The shelving units will need to be connected to power, controlled by switch(es), and installed by a certified electrician. Failure to do so may result in injury.
